

Bhagirathi Bal Shiksha Sadan Secondary School

Class - III

Sub - Computer

L-1

Working of a Computer

- **Input devices**: The devices used to enter data into a Computer. For example: Keyboard, mouse, Scanner, Microphone and Digital Camera.
- **Processing Unit**:- The devices processes the input data by performing certain calculations.

CPU

CPU stands for Central Processing Unit. CPU contains three parts:

1) Arithmetic and Logic Unit (ALU)

ALU performs all the arithmetic calculations and logical comparisons.

2) Control Unit (CU)

CU controls and manages the flow of information between different parts of the computer.

3) Memory Unit (MU)

MU stores all the data that is to be processed.

Answer the following question.

- Q-1 What does 'I' stand for in IPO Cycle?
- Q-2 What does ALU?
- Q-3 Draw two Input device
- Q-4 Draw a C.P.U.
