Unique Creatures

Animals around us have a variety of features. Some are big while some are small. Some crawl, some walk and some swim.

Read the description and see the pictures of animals given below. Write their names using the help box.

Do You Know?
Sloth is the laziest animal as it sleeps for about 18 hours a day. When awake, it remains upside down.

Chameleon Vulture Anaconda Eel Octopus Pelican Scorpion

1. A small creature with eight legs and a long tail in which it carries poison.

2. A large fish-eating water bird with a long bill, having a bag to store fish. It stays in groups near rivers, lakes and sea coasts.

3. A master of disguise, this animal can change its colour to match the surroundings, in order to catch its prey.

4. A large bird with no feathers on head and neck but a very sharp eyesight. It feeds on the flesh of dead animals.

5. A sea animal with a soft and round upper body and large eyes. This animal has eight long arms with which it catches food.

6. The biggest snake in the world. It lives in the Amazon forest of South America.

7. A long water animal with no legs and ears. It moves in a twisting manner. It carries poison inside.
