

Adding zero

When we add '0' to a number, we get the same number.

$$3 + 0 = 3$$

Adding one

When we add 1 to a number, we get the number just after it.

$$6 + 1 = 7$$

Let's Evaluate 2.4

1. Add 0 and write the answer.

$$(a) \triangle 5 + \triangle 0 = \triangle \quad (b) \triangle 9 + \triangle 0 = \triangle$$

$$(c) \triangle 1 + \triangle 0 = \triangle \quad (d) \triangle 8 + \triangle 0 = \triangle$$

$$(e) \triangle 3 + \triangle 0 = \triangle \quad (f) \triangle 4 + \triangle 0 = \triangle$$

$$(g) \triangle 2 + \triangle 0 = \triangle \quad (h) \triangle 6 + \triangle 0 = \triangle$$

2. Add 1 and write the answer.

$$(a) \triangle 7 + \triangle 1 = \triangle \quad (b) \triangle 1 + \triangle 1 = \triangle$$

$$(c) \triangle 5 + \triangle 1 = \triangle \quad (d) \triangle 8 + \triangle 1 = \triangle$$

$$(e) \triangle 4 + \triangle 1 = \triangle \quad (f) \triangle 2 + \triangle 1 = \triangle$$

$$(g) \triangle 3 + \triangle 1 = \triangle \quad (h) \triangle 6 + \triangle 1 = \triangle$$

Order of addition

Numbers can be added in any order. The answer remains the same.

Let's Evaluate 2.5

1. Fill in the blank circles.

(a) $3 + 5 = \bigcirc$

(b) $2 + 6 = \bigcirc$

(c) $5 + 3 = \bigcirc$

(d) $6 + 2 = \bigcirc$

(e) $1 + 4 = \bigcirc$

(f) $7 + 2 = \bigcirc$

(g) $4 + 1 = \bigcirc$

(h) $2 + 7 = \bigcirc$

Adding on abacus

We can add on an abacus.

Add 3 and 2.

Take 3 blue beads on the ones rod on the abacus. Add 2 yellow beads and count.

$3 + 2 = 5$

Let's Evaluate 2.6

Draw beads on abacus and add.

(a) $3 + 6 = \square$

(b) $4 + 2 = \square$

(c) $1 + 3 = \square$

(d) $4 + 3 = \square$
